

Technical requirements for “Procura” and other performances

Hernane Oliveira – Aerial Straps

Rigging point:

Height: Ideally 6m (adaptable for lower heights) – no limit upwards

Weight: WLL of 500kg

A pulley system is needed for changing the height of the straps during the act, but adaptable for a fixed height

Stage dimensions:

Back to front: Minimum of 5m

Side to side: Minimum of 5m
